

Clark Forklift Part

Clark Forklift Part - At present, there are over 350,000 Clark lift trucks performing globally, and upwards of 250,000 in service in North America alone. With five main lines across the world, Clark is proud to be one of the most expansive corporations in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, gas, LPG, hand-driven trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift, covers more than 120,000 individual components designed for 20 unique brands of lift trucks and automated equipment. Your regional Clark Supplier is your total source for availability of all your components needs offered by Clark Totalift.

Clark's phenomenal Parts Distribution Centers are conveniently located in Louisville, Kentucky, which serves both their consumers and dealers in North America, and Changwon, South Korea, which handles their Asian dealers and consumers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing manufacturers. Motivated to provide the highest level of value and service to our customers, Clark remains on the leading edge when it comes to improving output and benefiting performance.

Worldwide, Clark has one of the most outstanding supplier support networks. With over 550 locations worldwide, seller representation in over 80 countries and 230 locations in North America, their high level of commitment to their clients predominates the material handling market.

Clark proudly remains an innovative leader of the industrial equipment industry, pioneering protection features such as the worker restraint system. This exceptional dedication to safety is now a customary feature on every lift truck.

Clark's continual effort to have the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 - Clark, is the first lift truck manufacturer across the globe to be certified with the globally accepted quality standard ISO 9001 for each and every one of their manufacturing plants. Additionally, the ISO 14001 Environmental Management System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement allows Clark to be ready for any number of environmental limitations, thus placing them in a prevailing market position.

Clark has chosen the very economical and advantageous system of "Lean Production" for its assembly plants and application of resources. This structure was developed to acknowledge the most successful approaches of production plant management and ensuring maximum proficiency. Clark has completed this transition of its Korean facility. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and production efficiencies.

By working in concert, Clark's product suppliers and engineers communicate towards enhancing product proficiency while minimizing costs. The new value engineering agenda combines modern product growth and delivers superior customer support and service within the industry.
