In the U.S.A., Doosan Infracore America Corporation is headquartered in Suwanee, Georgia. It is home to a 170,000 square foot manufacturing facility, which is the home of the Compact Equipment and Construction department. West Caldwell, New Jersey is home to the Machine Tool division and Cleveland, Houston is home to the Forklift division. The U.S. headquarters in Georgia facilitates a first rate parts operation capable of supplying an excess of 25,000 line items to support Lift Truck, Compact Equipment, Machine Tool and Construction customer wishes.

There are well over 220 Doosan service and sales locations operating in Canada and the United States. Furthermore, there are more than 90 independent dealers moving lift truck materials and materials handling equipment. This network allows Doosan Infracore America to aggressively compete in this competitive marketplace. The lift truck product line impressively includes 63 different machines consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion lift trucks. Capacities of these numerous truck designs vary from 3,000 to 33,000 lbs. All trucks are designed in an ISO 9001 qualified facility.

Doosan Infracore America is the fastest emerging forklift and lift truck corporation in the North American market, due to its exceptional level of product performance and their consistently high level of buyer support and service given to all Doosan Infracore Forklift users. The U.S. lift Truck division situated in Cleveland has a expert team experienced in Product Sales, Purchasing, Advertising, Logistical and Technical Support.

At first the domestic forklift market in Korea was an open import enterprise. Korea Machinery Co. Ltd. started in 1960, to import fully assembled forklifts as part of a domestic machinery expansion project. Sales of these products were primarily targeted to state-run corporations, large scale organizations, and the armed forces. This ultimately led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced business operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a forklift manufacturing plant was successfully completed. Continuous technical instruction grew to become the new focus for enhancing quality and product development.

Daewoo started the first home-based forklift business in 1967, and rapidly acquired a massive 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's advanced technological enhancements combined with sales success placed them in a position of significant expansion of their lift truck operations.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a cooperative venture project to help them in the highly competitive North American materials handling industry. This joint-venture proved highly profitable for Daewoo and their lift truck product sales expanded greatly. In 1984, the company finished development of a new facility to help in manufacturing high end value-added goods for export. In 1993, the corporation had a global sales system and started exporting models they had established through in-house technology, as an independent brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth opportunities into international markets.
